**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-34 and 54-56, drawn to method of manufacturing an article, classified in class 228, subclass 122.1.
- II. Claims 35-53, drawn to an article of manufacture, classified in class 428, subclass 642.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article as claimed can be made by a different process, for example, chemical vapor deposition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

***SPECIES ELECTION***

This application contains claims directed to the following patentably distinct species of the claimed invention:

If the applicant elects Group I, an election of Species (IV) is required.

Art Unit: 1725

SPECIES I (claims 1-12, 29-34, and 54-56) drawn to a method including applying a substrate to a bonding layer and applying a braze-promoting layer to the bonding layer.

SPECIES II (claims 13-15) drawn to a method including plating a braze-promoting layer to a substrate.

SPECIES III (claims 16-19 and 28) drawn to a method including electroplating a braze-promoting layer carried out in an aqueous bath consisting of nickel and cobalt, the aqueous bath having a pH of from about 5 to 7.

SPECIES IV (claims 20-27) drawn to a method including electroplating a braze-promoting layer carried out in an aqueous bath consisting of nickel sulfate, nickel chloride, a buffering salt, a lead salt, and ammonium, the aqueous bath having a pH of from about 3 to 12.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 1725

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zidia Pittman whose telephone number is (703) 305-1248. The examiner can normally be reached on Monday – Thursday and alternate Fridays from 8:30 am to 6:00 pm.
